OBJECTIVE

I am a B.Tech student specializing in Artificial Intelligence and Data Science with a strong interest in data analytics. I have a good understanding of data analysis concepts and am eager to apply my skills to real-world problems

EDUCATION

• KATHIR COLLEGE OF ENGINEERING

B.tech/Artificial intelligence & data science

2023-2027

3rd Year

INTERNSHIP EXPERIENCE

• Web Development Intern

Cofsoft Technologies

Duration: july/2025

Developed responsive web pages using HTML, CSS, and JavaScript

Worked on basic front-end design and layout structuring

Gained hands-on experience in website development and debugging

Learned to build user-friendly and visually appealing web interfaces

Collaborated with the team to understand real-world project requirements

Improved problem-solving and practical coding skills through live tasks

• AI-Powered Application Development Intern

Boredom Technologies LLP

Duration: june/2025

Completed an intern MVP focused on AI-powered applications for modern web builders

Worked on integrating AI concepts into web-based applications

Gained exposure to AI-driven features, automation, and smart user interactions

Assisted in building and testing minimum viable products (MVPs)

Learned how AI solutions are designed for scalability and real-world use cases

Enhanced understanding of AI, web technologies, and product development lifecycle

• Brainary Spot Technology – Intern

12-12-2025 - 27-12-2025

Completed a comprehensive Data Analytics Internship, gaining hands-on experience in analyzing and interpreting large datasets.

Worked with tools such as Excel, SQL, and [any other tools you used, e.g., Python, Tableau, Power BI] to extract actionable insights.

Created visual reports and dashboards to support data-driven decision-making.

Performed data cleaning, data transformation, and statistical analysis to identify trends and patterns.

Collaborated with the team to optimize processes and improve business performance through data insights.

SKILLS

- Python (Basics)
Data Analysis
Data Visualization
SQL (Basics)
MS Excel
Statistics (Basic concepts)
Pandas & NumPy (Basics)
Machine Learning (Fundamentals)

PROJECTS

- **Brain tumor classification from MRI images using CNN(MINI PROJECT)**
 - Goal: classify MRI brain images into tumor types (e.g., no tumor vs tumor, or multi-class meningioma/glioma pituitary) using a Convolutional Neural Network (CNN). Pipeline: dataset → preprocess/augment train CNN → evaluate (accuracy, confusion matrix, ROC) → optionally deploy
 - Worked in team project(Farmer's friend)

- **Data Analytics Project using Excel**

Worked on a data analytics project using Microsoft Excel to evaluate student academic performance.

Processed raw data by performing data cleaning, sorting, filtering, and normalization to ensure accuracy.

Utilized Excel formulas such as AVERAGE, IF, COUNTIF, and VLOOKUP for calculations and data analysis.

Designed charts, graphs, and visual reports to identify trends and patterns in student performance.

ACHIEVEMENTS & AWARDS

- Successfully completed multiple industry-recognized online courses through Infosys Springboard and FutureSkill Prime, enhancing technical and professional skills.

- Recognized as Outstanding performer during AI powered App internship at Boredom Technologies LLP.
- Participated in HACK-FORGE Hackathon – Sri Shakthi Institute of Engineering and Technology (Mar 2025).

CERTIFICATIONS

- Completed web development training in codsoft.
- Completed MVP - AI-Powered App Internship, certified by Boredom Technologies LLP.
- Completed Data analytics in Brainary Spot Technology
